NAME : Riya Pawaskar

ROLL NO.: 27

DATE OF ASSIGNMENT : 19/08/26

DATE OF SUBMISSION : 19/08/26

1. import pandas as pd – imports Pandas library.

```
import pandas as pd
```

2. pd.read_csv() – reads a CSV dataset.

```
df = pd.read_csv("Students.csv")
```

3. head() – displays the first records.

```
print(df.head())
```

```
   Roll No   Name Department  Marks  Attendance
0      101   Amit     BSc IT     78          85
1      102  Priya     BSc CS     65          90
2      103  Rahul     BSc IT     88          92
3      104   Neha     BSc CS     72          80
4      105  Rohan     BSc IT     55          70
```

4. tail() – displays the last records.

```
print(df.tail())
```

```
   Roll No   Name Department  Marks  Attendance
0      101   Amit     BSc IT     78          85
1      102  Priya     BSc CS     65          90
2      103  Rahul     BSc IT     88          92
3      104   Neha     BSc CS     72          80
4      105  Rohan     BSc IT     55          70
```

5. shape – gives the number of rows and columns.

```
print(df.shape)
```

```
(5, 5)
```

6. columns – displays column names.

```
print(df.columns)
```

```
Index(['Roll No', 'Name', 'Department', 'Marks', 'Attendance'], dtype='object')
```

7. dtypes – displays data types of columns.

```
print(df.dtypes)
```

```
Roll No        int64
Name          object
Department    object
Marks          int64
Attendance     int64
dtype: object
```

8. info() – displays complete information about the dataset.

```
print(df.info)
```

```
<bound method DataFrame.info of    Roll No   Name Department  Marks  Attendance
0      101   Amit     BSc IT     78          85
1      102  Priya     BSc CS     65          90
2      103  Rahul     BSc IT     88          92
3      104   Neha     BSc CS     72          80
4      105  Rohan     BSc IT     55          70>
```

9. describe() – displays basic statistical information.

```
print(df.describe)
```

```
<bound method NDFrame.describe of    Roll No   Name Department  Marks  Attendanc
0      101   Amit     BSc IT     78          85
1      102  Priya     BSc CS     65          90
2      103  Rahul     BSc IT     88          92
3      104   Neha     BSc CS     72          80
4      105  Rohan     BSc IT     55          70>
```

10. max() – finds the maximum value.

Double-click (or enter) to edit

```
print("Maximum Marks ",df["Marks"].max())
```

```
Maximum Marks  88
```

11. min() – finds the minimum value.

```
print("Maximum Marks ",df["Marks"].max())
```

```
Maximum Marks  88
```
