

Name : Riya Pawaskar	Class : SYIT
Roll no. : 27	Date of submission: 22/07/26

Practical 2

a) Write a python code to create nested tuples.

Program:

```
student = ("Riya",27,("BscIT","Semester III"),80)
print("Name: ", student[0])
print("Roll No.: ", student[1])
print("Department: ", student[2][0])
print("semester: ", student[2][1])
print("percentage: ", student[3])
```

Output:

```
RESTART: C:/Users/mvluu
Name:  Riya
Roll No.:  27
Department:  BscIT
semester:  Semester III
percentage:  80
```

b) 2b. Write a python code to sort the nested tuple using sorted
() function.

Program:

```
data = [(1,4),(3,2),(5,1)]
sorted_data = sorted(data,key = lambda x: x[1])
print(sorted_data)
```

Output:

```
= RESTART: C:/Users/mvluu
[(5, 1), (3, 2), (1, 4)]
```

c) Write a python code to copy or clone list.

Program:

```
stud = ("Riya", 27, ("BscIT", "Semester III"), 85)
stud2 = ()
stud2 = stud

print("Name:", stud2[0])
print("Roll no.:", stud2[1])
print("Department:", stud2[2][0])
print("Semester:", stud2[2][1])
print("Percentage:", stud2[-1])
```

Output:

```
Name: Riya
Roll no.: 27
Department: BscIT
Semester: Semester III
Percentage: 85
```

d) Write a python code to check immutability property of python tuples.

Program:

```
D = (5, 2)
D[1] = "I"
```

Output:

```
Traceback (most recent call last):
  File "C:/Users/mvluc/Documents/PDS RIYA/practical2.py", line 2, in <module>
    D[1] = "I"
TypeError: 'tuple' object does not support item assignment
```
